Mr. D. B. King, General Foreman
United States Steel Corp.
Far & Structural Steel Yards
Gary Works
Gary, Indiana 46402

Dear Mr. King:

We want to thank you for giving us an opportunity to bid on cleaning your mobile equipment.

We propose to provide you with a self contained gas-fuel oil truck mounted steam cleaner rated at 480 G.P.H., 300 P.S.I., 325 degrees F. This is a two gun unit which we provide with two operators, cleaner, fuel, and scaffolding for \$43.00 per hour.

Mr. Justus showed us several areas where we could do the work and the area in the wheel plant next to the shot blaster appears to be most suitable, although we also could set up in the axle plant.

We are looking forward to demonstrating what we can do.

Very truly yours,

Liquid Engineering Corp.

Frank Brown
